Team ID	SWTID-2026-5919
Date	30.09.2026
Project Name	AI FAQ Assistant API

Problem Statement – PS-1

I am	A customer or user looking for quick answers to frequently asked questions.
I'm trying to	Find accurate information and get answers to my questions quickly.
But	I have to search through different sources or wait for customer support staff to respond.
Because	Frequently asked questions are not always organized in one easily accessible system.
Which makes me feel	Frustrated and delayed when trying to find simple information.

Problem Statement – PS-2

I am	An organization or customer-support administrator who manages frequently asked questions.
I'm trying to	Organize FAQ information and provide answers to users efficiently.
But	I have to repeatedly handle similar questions and manually manage FAQ information.
Because	There is no centralized and intelligent system to manage FAQs and assist users automatically.
Which makes me feel	Overloaded and less efficient while handling repetitive customer queries.

Final Problem Statement

Users need a centralized and intelligent FAQ system that can organize frequently asked questions and provide quick AI-assisted answers, while reducing repetitive work for customer-support administrators.
